## How to pair bluetooth plantronics voyager legend

Check out this five-minute YouTube video for an easy-to-follow visual guide to using your Bluetooth headset! Keep in mind that our knowledge is limited, as we don't carry this specific model. **\*\*Basic Controls:\*\*** Switch on/off by sliding the switch at the back of the headset. Adjust volume with the + and - buttons on the top back. Mute calls with the Voice Recognition Button; tap again to unmute. **\*\*Answering/Ending Calls:\*\*** Press the large Answer Call button to answer a call, and tap it again to end. **\*\*Charging:\*\*** Charge the headset using the stand, case, or USB cable. The charging magnets are located on the back under the On/Off switch. The case can hold extra power; just plug it into a charger. **\*\*Pairing:\*\*** Switch on, press and hold the Answer Call button for 3 seconds to enter pairing mode (or use Voice Recognition). Activate Bluetooth on your device and select "PLT Legend" from the list. Enter 0000 as the password if prompted. **\*\*Voice Recognition:\*\*** Tap the Voice Recognition Button, wait for the prompt, and give voice commands! To connect your Plantronics Voyager Legend headset, first turn it on by sliding the power switch to the 'on' position - you should see a green light. The headset's LEDs will start flashing red and blue, indicating that it's in pairing mode. If you don't see this flash, try turning the headset off and on again. Be aware that if your headset has already been paired, this step won't work. To pair with a different phone or re-pair to the same one, follow these steps: Turn on your phone's Bluetooth feature while the headset's LEDs are flashing red and blue. On an iPhone, go to Settings > General > Bluetooth > On, and on Android devices, go to Settings > Wireless & Networks > Bluetooth: On > Scan for devices. Next, select 'PLT Legend' as a found device on your phone and enter four zeros (0000) for the passcode if prompted. Once paired, you'll hear "pairing successful" from the headset, and its LEDs will stop flashing. To enable caller name announcement, allow access to your contacts if your phone prompts you. Troubleshooting tips for pairing your Plantronics Voyager Legend headset with your iPad7+: Turn on your headset by sliding the power switch to the 'on' position, indicated by a green light. Use voice commands: tap the Voice button and say "Pair mode" or press and hold the Call button until you hear "Pairing". Enable Bluetooth on your phone while the Voyager Legend LEDs are flashing red/blue. Select your device from the list of found devices, then enter four zeros (0000) as the passcode if prompted. After successful pairing, the LEDs will stop flashing and you'll hear "pairing successful". If you're experiencing issues with your Plantronics headset not connecting, try turning off and on the device to reset it. Ensure that Bluetooth is enabled on your phone and set to search for new devices. You can also try placing the Voyager Legend in discovery mode by pushing the Bluetooth switch to its extreme position, which should allow your phone to recognize it. Some users have reported success with this method: turn off your headset, enable Bluetooth on your phone, then turn on the headset and hold the Call button until it appears in the list of discovered devices. Select it from the list and you're ready to go. To reconnect your Plantronics Voyager Bluetooth headset, follow these steps: Turn on the headset by sliding the power switch to the 'on' position, indicated by a green light. You can also use voice commands, saying "Pair mode" or pressing and holding the Call button until you hear "Pairing." On your phone, go to Settings > General > Bluetooth (for iPhone) or Wireless & Networks > Bluetooth: On > Scan for devices (for Android). Select "PLT Legend" on your phone as a found device and enter four zeros (0000) for the passcode. Once paired, LEDs will stop flashing red/blue, and you'll hear "pairing successful." To enable caller name announcement, allow access to your contacts if prompted. For iPhone 6S Plus users, ensure Bluetooth is on and have the menu up, then turn on the headset while depressing the power button until lights change from blue to red/blue. Tap "520Plantronics" under "Other Devices," type in: 0000, and your headset will be re-paired. We provide office headset support through our internal database, with expertise spanning over 25 years in North America's market. Our services are open to all headset users, regardless of their affiliation with us.
